

CLEARSTREAM™

MICRON-R™

WITH REFLECTOR

Enjoy full 1080 HDTV broadcasts with the ClearStream™ Micron-R™ antennas and reflector. Sleek and powerful, this high-performance antenna is engineered to deliver uncompromised indoor, high gain reception.

The Micron-R™ is our #1 recommended indoor antenna. It is designed for those living in urban areas or lower-level homes, who experience multipath interference.

The precision engineered reflector focuses 2X more broadcast signal through the antenna. This indoor antenna offers customizable setup to meet individual preferences and reception needs.

For its size and affordability, you will not find a better indoor antenna.

The Micron-R™ delivers DTV signals from widely located (spaced) broadcast towers, negating the need for an antenna rotator.

The Micron-R™ offers an extremely wide, 70 degree, beam-width pattern on core UHF channels.

The Micron™ represents a new breakthrough in size and gain. Advanced design software allows these 10" x 11" antennas to be smaller and more powerful than ever before. This leap forward in efficient design allows up to 98% of the available broadcast signal to actually reach the incoming antenna cable rather than being lost to impedance mismatches.

Clearstream™ technology results in an indoor antenna with unsurpassed HDTV performance.

CLEARSTREAM™

MICRON-R™

- Range: Up to 35 miles
- Beam-width (Horizontal Plane)
470 to 700 MHz: 70 degrees
- VSWR: 2:5 Typical; 4:0 Max
- Front to Back Ratio: Max 22 dBi @ CH 51; Typical 15 dBi
- Directivity: R set up with reflector
Max gain: 8.4 dBi
- Size Assembled:
10"L x 11"W x 4.5"D

SKU #	Master Carton	Item Description	Retail
CSM1-WS	10	ClearStream Micron-R™ Indoor DTV Antenna w/ Reflector	\$79.99
