

PURE HDTV

Introducing the new CLEARSTREAM 2V™ Antenna.
Now with improved performance for weak VHF stations!

Sleek and powerful, this high-performance Antenna is engineered to deliver uncompromised high gain Digital/HDTV reception.

LONG RANGE INDOOR/OUTDOOR HDTV ANTENNA

CLEARSTREAM 2V™

The first broadband antenna without performance compromises, the C2V's unique intergrated diplexer allows specially tuned HDTV elements to be combined without performance degradation. While legacy antennas promise reliable reception for all channels, most fall well short of their claims due to the inefficiencies of their outdated designs.

Traditionally multiband antennas are inherently compromised. When signals from their disparate elements, are combined, up to 90% of the television signal can be lost through impedance mismatches and phase cancellation. The C2V's unique network feed eliminates these losses. The result is the most efficient and powerful all band antenna on the planet offering unequalled performance across the DTV band.

- Easy set-up
- Wide reception patterns
- Range: Up to 50+ miles
- Peak Gain 12.4 dBi
- New engineering for core UHF/VHF DTV frequencies
- 100% compatible with all ATSC tuners
- Lifetime warranty

Works great with Tivo®!
