

Receive Distant and Weak FM Stations

The FM 360°, a high-performance FM radio antenna has an extended range of over 55 miles and a peak gain of 3.2 dBi. This exceptional power provides reception of the most distant FM stations.

LONG RANGE OUTDOOR FM RADIO ANTENNA

 ANTENNAS
DIRECT®

FM 360°

The sleek Antennas Direct FM 360° houses panoramic reception of FM radio broadcasts. Improvements in element technology have resulted in a smaller compact design. A fraction of the size of traditional antennas, the FM 360° features higher gain required for reliable HD radio reception in addition to traditional FM radio frequencies of 88 - 108 Mhz.

The polished aluminum body construction presents a contemporary look and is weatherproof to resist corrosion and has a lifetime warranty.

- FM Frequencies 88 - 108 MHz
- High Gain for HD Radio Reception
- Lifetime Warranty
