

# PURE HDTV

Enjoy full 1080 HDTV broadcasts with the CLEARSTREAM™ Micron Antenna. Sleek and powerful, this high-performance Antenna is engineered to deliver uncompromised indoor, high gain Digital/HDTV reception.\* Pure and crisp.

\*Requires an HD television with built-in or set-top HD or standard digital receiver.

HDTV HIGH GAIN INDOOR ANTENNA

## CLEARSTREAM™ MICRON™

Advanced design software allows these 10" x 11" antennas to be smaller and more powerful than ever before. This leap forward in efficient design allows up to 98% of the available broadcast signal to actually reach the incoming antenna cable.

The Micron's compact design offers excellent gain and impedance matching across the entire UHF DTV spectrum. It is truly superior to existing compact antennas, with great directivity at all UHF DTV frequencies and a peak gain of 8.25 dBi. The Micron™ is optimized for the UHF band, but can also provide good reception of high VHF band signals for customers in stronger signal areas. The Micron™ is designed to pull in strong signals at a distance of up to 25 miles from the local broadcast towers\*.

\*Terrain and other obstructions can affect the reception.

- Most Powerful Compact Antenna on the Market
- 25 Mile Range
- Optimized for Digital TV Frequencies
- Multi-Directional
- Easy Set-Up
- Table Top or Wall Mountable
- 100% Compatible with all DTV Tuners and Converter Boxes

### CLEARSTREAM Micron™

- Range: up to 25 miles
- Beamwidth (Horizontal Plane): 470 to 700 MHz: 70 degrees
- VSWR: Typical 2:1 or better, Max 3:1, typical less than 2:1 from 470 MHz to 700 MHz
- Front to Back Ratio: Typical 15 dB
- Size Assembled: 10"h x 11"w x 4.5"d
- Lifetime Warranty
