Before permanently attaching the antenna to any surface, TEST RECEPTION in that area. Connect the antenna to your TV converter box and run a full channel scan. If reception is not as desired, move the antenna and test. You may need to repeat this process until you find the best location. If you have an older TV, you may need to call your local TV service provider for assistance.

Tools Required: Medium cross point screwdriver.

Before beginning assembly, make sure all parts are present.

The CLEARSTREAM™ 1 CONVERTIBLE comes with:
1) Reflector Mounting Hardware:
2) Antenna Base
3) Antenna Base Stem
4) Lock Element
5) Coaxial Cable, 40'-90'
6) 47' Threaded Bolt
7) 1/4' Threaded Bolt
8) Wing Nuts and U-Clamp
9) Mast Clamps
10) Weather Boot (optional)

Assemble Antenna:

1. Attach stem to base, turn until it clicks into place.
2. Attach base to loop element.
3. Line up arrows and slide base onto base counter-base until you hear a click and reach the 2nd click.
4. Attach reflector and slide into notch.
5. Assemble the 47' threaded bolt,oted and mast clamp hardware and attach as shown.
6. Connect coaxial cable to the back of the antenna and then to your TV.
7. Slide in your antenna mast. Add the clamp and tighten wing nuts.
8. Face antenna toward the broadcasting towers in your area. Visit antennamep.com to locate your local towers.
9. Make sure your TV is set to Antenna source and not Cable.
10. Scan for available channels. If signal is weak and you need to repoint your antenna, you must repoint. Call our Helpdesk if you need assistance.

Troubleshooting:

Problem: I’m not getting any signals at all.
Possible causes:
1. You may be experiencing poor reception due to obstructions or interference.
2. Your TV may not be receiving signal.

Solution: Try repositioning the antenna or adjusting the TV’s settings.

Problem: I’m getting a weak signal.
Possible causes:
1. Your location may not be ideal. Consider moving the antenna to a different area.
2. Your TV may not be receiving signal.

Solution: Try repositioning the antenna or adjusting the TV’s settings.

Problem: I’m getting too many channels.
Possible causes:
1. Your location may not be ideal. Consider moving the antenna to a different area.
2. Your TV may be set to receive all channels.

Solution: Adjust your TV’s settings to only receive channels you want.
