**VHF RETROFIT KIT**

Before beginning assembly, make sure all pieces needed are present.

**VHF Retrofit Kit comes with:**
1. VHF Dipole Kit
2. 36” Coaxial Cable with Weather Boot
3. Four Zip Ties

**Tip:** The VHF Dipoles receive signals when extended horizontally towards the broadcast tower.

Go to [www antennapoint com](http://www.antennapoint.com) or call your local TV station to locate the direction of your local VHF broadcast tower(s). The VHF Dipoles receive signal for up to 35 miles.

The VHF Retrofit Kit will attach directly to the reflector screen on the following Antennas Direct®, Inc. UHF antennas:
- Micron-R
- Micron-XG Amplified
- ClearStream™ 1 Convertible
- ClearStream™ 2
- ClearStream™ 4
- DB2e
- DB4e
- DB8e

Antennas Direct Inc.
Lifetime Limited Warranty

Antennas Direct Inc. warrants this product against any defects in materials or workmanship for as long as you own the product. No warranty claim will be honored unless at the time the claim is made you present proof of purchase from an authorized Antennas Direct Inc. dealer. Antennas Direct Inc. will either repair or replace the defective product at no charge to you. This warranty covers parts, but does not cover any costs incurred in removal or reinstallation of the product. This limited warranty does not apply if the product is damaged or fails from misuse, improper installation, abuse, and modification of the product as originally manufactured by Antennas Direct. Antennas Direct Inc. will not assume any liability for any other warranties, expressed or implied by any other person. The foregoing shall be the sole and exclusive remedy of any person, whether in contract, tort or otherwise, and Antennas Direct Inc. shall not be liable for incidental or consequential damage or commercial loss, or from any other loss or damage as set forth above.

**Troubleshooting**

1. You must RESCAN your converter box or TV.
   - A TV must be set to the proper input source, using the TV remote control.
   - Go into the setup menu and select the proper source, it may be labeled antenna, set, broadcast, or cable, off.
   - Within the setup menu select channel setup or channel scan, again you may need to refer to your TV user’s manual for exact directions.
   - If the initial rescan does not bring in all desired channels, follow the docket rescans below.

**Docket Rescan Procedure**

1. Disconnect the antenna from the converter box or digital TV.
   - Rescan the converter box or digital TV without the antenna connected. As with any scan, follow the on-screen instructions or owner’s manual for your device.
   - Unplug the converter box or digital TV from the electrical outlet for at least one minute.
   - Reconnect the antenna to the converter box or digital TV and plug the unit into the electrical outlet.
   - Rescan the converter box or digital TV one more time.

2. You do not have a clear line of sight to your local broadcast towers.
   - You might need to elevate and/or move your antenna. Using a ladder may be helpful.
   - You have found the right location for your antenna when all of your local channels appear after a subsequent rescan. Remember to rescan at every location that you try.

3. You are outside of the range of your antenna’s capabilities.
   - Depending upon the distance between your home and the local TV broadcast towers, you may need a longer range antenna. Antennas Direct® offers many models for this purpose.
