

CLEARSTREAM 2V™

Introducing the C2V! Now with improved performance for weak VHF stations.

The first broadband antenna without performance compromises, the C2V's unique integrated diplexer allows specially tuned HDTV elements to be combined without performance degradation. While legacy antennas promise reliable reception for all channels, most fall well short of their claims due to the inefficiencies of their outdated designs.

Traditional multiband antennas are inherently compromised. When signals from their disparate elements are

combined, up to 90% the television signal can be lost through impedance mismatches and phase cancellation. The C2V's unique network feed eliminates these losses. The result is the most efficient and powerful all-band antenna on the planet offering unequalled performance across all frequencies.

The ClearStream 2V has arrived! The C2V is the ultimate solution for Digital TV broadcasting reception in virtually all markets. No antenna has ever been brought to market that can rival it's compact, powerful multi-band performance.

CLEARSTREAM 2V™

- VHF 174 - 216 MHz (Channels 7-13)
- UHF 470 - 806 MHz (Channels 14-69)
- Max gain: 10.4 dBi UHF; 3.1 dBi VHF
- Range: 50+ Miles
- Impedance: 75 Ohm output F connection
- New engineering for current UHF/VHF DTV frequencies
- Consistent gain through the entire UHF/VHF DTV channel spectrum
- Great for indoor, outdoor and attic use
- Dimensions: 20"L x 35.5"W x 6.5"D

SKU #	Master Carton	Item Description	Dealer Cost	Retail
C2V	10	ClearStream 2V™ Long Range VHF/UHF DTV Antenna	<input type="text"/>	\$109.99
