

CLEARSTREAM MICRON™

Indoor Amplifier Variable Gain (5-20 dB)

This product may be used to enhance picture quality.

Over amplification may reduce picture quality. Install the antenna without the amplifier first.

Installation Instructions:

1. Connect antenna to TV or receiver and perform a full channel scan as specified by the TV owner's manual.
2. If reception is not as desired, connect amplifier as pictured above.
3. Set the amplifier to 10 dB and perform another complete channel scan.
4. If reception issues persist, use the variable gain settings to adjust the amplification. Run a complete channel scan after each change.
